

COMPACT STYLE  
**KIOSK** SYSTEM

| **BK-240S**

## Optimize queuing and Improve efficiency

- ▶ Built for Easy Serviceability
- ▶ Floor Stand or Countertop Stand or Wall Mount
- ▶ Perfect Fit for Any Business
- ▶ Simple Access

# BK-240S

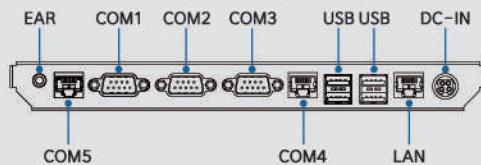

## Specification

|               |                                                                                                                   |
|---------------|-------------------------------------------------------------------------------------------------------------------|
| Processor     | Intel® Celeron® J6412 (Elkhart Lake)<br>12'th AlderLake i3/i5/i7                                                  |
| Memory        | 8G DDR4, Up to 16GB (option)                                                                                      |
| HDD           | 120G 2.5" SSD or M.2 SSD, Up to 1TB (option)                                                                      |
| LCD           | 23.9" TFT 1920 * 1080<br>LED Backlight, 250 ~ 350 cd/m² (typ.)                                                    |
| Touch         | 10 Point Capacitive Touch, USB interface<br>Full-window type                                                      |
| OS            | Windows 10/11 IoT 64bit / Linux                                                                                   |
| I/O Interface | 1x Ethernet Port (Gigabit RJ45)                                                                                   |
|               | 6x USB                                                                                                            |
|               | 5x Serial port ( D-SUB * 3, RJ45 * 2 )                                                                            |
|               | COM1~3 (D-SUB 9Pin 5V/12V by BIOS)                                                                                |
|               | COM4 ( RJ45 with flow control, 5V/12V by BIOS )<br>COM5 ( RJ45 only RX/TX with 5V,<br>Reserved for MSR with USB ) |
|               | 1x Audio Jack                                                                                                     |
| Sound         | 2 x 3W (Stereo)                                                                                                   |
| Certification | KC                                                                                                                |
| Color         | White                                                                                                             |
| Power         | Adaptor Input 100~240V/50~60Hz,<br>Output 12V/24V                                                                 |

## Option

|                 |                                                   |             |            |
|-----------------|---------------------------------------------------|-------------|------------|
| Printer         | Thermal 3" (72/80mm), Jamfree, Autocut, 200mm/sec |             |            |
| Barcode Scanner | 1D/2D Box type                                    | Card Reader | IC/MSR/NFC |
| Stand           | Stand alone type                                  |             |            |

## Port

- ▶ 21.5" Display Kiosk with PCAP Touch Screen
- ▶ High speed Intel Processor
- ▶ Integrated 3-inch thermal Printer & Barcode Scanner
- ▶ Structure for easy maintenance
- ▶ Slim and Stylish Design for retail and hospitality
